Part III DETAILED ACTION

Notice to Applicant(s)

1. This action is responsive to the following communications: Response filed on **11/25/2002**.
2. This application has been reconsidered. Claims 32-37 are pending.

Claim Objections

3. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 39-44 been renumbered 32-37 respectively.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 32-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2622

With respect to claim 32, it is unclear to the Examiner how the toner level register is decremented "if the accumulated value is less than or equal to the toner level of the print engine" (lines 6-8 of claim 32) if there is no prior information of the toner level (lines 1-3 of claim 32).

6. Claim 32 recites the limitation "the toner level" in line 3 of the claim. There is insufficient antecedent basis for this limitation in the claim.

7. Claim 32 recites the limitation "the toner level register" in line 6 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claim 32 is rejected under 35 U.S.C. 102(b) as being anticipated by Sakuma (U. S. 5,663,750).

With respect to claim 32, Sakuma discloses accumulating in a first register (22) the toner values of all the pixels in a rasterized image prior to sending the job to the printer (column 4, lines 39-59); decrementing the toner level register (figure 4) at the printing location if the accumulated value is less than or equal to the toner level of the print engine (which reads on updating the

remaining ink value stored in non-volatile memory 21 when more than a little ink remains) (column 5, line 59 to column 6, line 3), and sending the print job to the printing location for rendering (column 5, lines 59-61).

10. Claim 32 is rejected under 35 U.S.C. 102(b) as being anticipated by Fukasawa et al (U. S. 5,530,527).

With respect to claim 32, Fukasawa discloses accumulating in a first register the toner values of all the pixels in a rasterized image prior to sending the job to the printer (column 2, lines 54-60); decrementing the toner level register at the printing location if the accumulated value is less than or equal to the toner level of the print engine (which reads on a renewed value in the table for agitation control is added to the storage value) (column 7, lines 10-24), and sending the print job to the printing location for rendering (column 8, lines 42-51).
